

In regards to proposed LPFM expansion, while I have no problem with additional stations, I do have an issue with these types of providers taking president over existing regional broadcasters such as KLOVE.

This radio station provides family friendly, non partisan quality broadcasting to thousands of people in my area alone. To allow a disruption of this sataion would present yat another example of family values taking a back seat to trends and the potential for many more instances of Shock Jock type programs which, in my professional opinion, do terrible and permanaent damage to the children of our country.

KLOVE provides a safe, secure entertaining and fundamentally American venue which offers hope and solice to thousands daily.

KLOVE is listener supported. It exists solely because people like me send in money to keep it on the air in our communities.

Please do not legislate out a community's chice in programing.

Thank you.
